Szabolcs Balogh (MVM Group)
Csaba Csiszár (BME)
Bálint Michaletzky (GreenGo)
Zoltán Papp (Porsche Hungária)
Gábor Pete (Vodafone)
Tamás Strang (BKK)

Our activity in 2023: industry workshop series

During the year, building on the success of our conference held in November 2022, we organized three thematic workshops, to which we invited stakeholders from the e-mobility sector. The workshops took place at the following dates and locations:

10 March 2023 – Porsche Hungária Innovation and Training Centre

• Our first comprehensive industry workshop focusing on open regulatory issues related to charging infrastructure.

20 June 2023 – MVM Headquarters, Jedlik Ányos Room

• Industry workshop focusing on the expected requirements of the new EU Regulation on the Deployment of Alternative Fuels Infrastructure (AFIR) and the outlook for decarbonizing the automotive sector.

3 October 2023 – Porsche Hungária MOON CITY

• Workshop focusing on national preparations for the implementation of AFIR and the expected new support schemes for e-mobility.

Industry Workshop Series on E-Mobility

JEDLIK ÁNYOS KLASZTER

More than forty business leaders and industry experts took part in each workshop, engaging with our speakers on the most pressing issues, including:

• The impact of decarbonization regulations on the automotive industry
• The requirements of the new EU Regulation on the Deployment of Alternative Fuels Infrastructure (AFIR) and the challenges associated with its implementation
• Challenges related to ad hoc charging and digital payment solutions
• EV charging infrastructure at shopping centres following the expiry of OTÉK requirements
• Integrating energy storage and energy management into charging infrastructure
• Lessons learned from existing support schemes and their expected impact

Knowledge Sharing & Information Exchange

JÁK provides an effective platform for ecosystem stakeholders to learn about industry best practices, exchange experiences and share information with one another and with policymakers.

• In 2023, we were once again pleased to see our members share insights into the success of technical developments and business initiatives of common or shared interest. One example was the lessons learned from operating the **electric vehicle fleet supplied by Porsche Hungária to Vodafone**.

• JÁK regularly incorporated industry experience and insights into its comments and position papers submitted to the government.

Representing the Hungarian E-Mobility Sector

JEDLIK ÁNYOS KLASZTER

The reputation of JÁK is reflected in the fact that, in response to numerous invitations, we regularly have the opportunity to present the state of e-mobility in Hungary at both domestic and international events.

• In 2023, the **JÁK Hungarian E-Mobility Cluster** online presentations were viewed by audiences at one V4, one Korean and two Taiwanese professional conferences.

• We participated in the work of the **AFIR Support Group** of EU Member States.

• We took part as moderators at the automotive industry conference organized by **Portfolio and MAGE**, as well as at the **HIPA Automotive Conference**.
