ELEVEN YEARS IN HELPING THE CLEAN ENERGY AND MOBILITY TRANSITION – REPORT ON YEAR 2025

JÁK Hungarian E-Mobility Cluster

Major Members and Partners 2014-2026

JÁK Board and Management

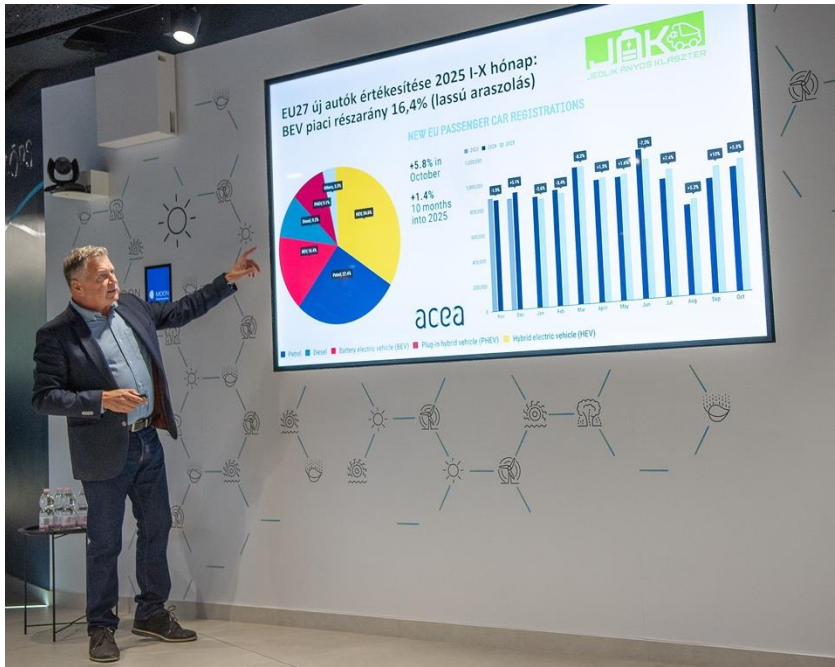
Executive director: ZoltánVígh

Members of the Board:
Chairman: Róbert Kun (TTK)
Roland Kökény (E.ON Hungaria)
Szabolcs Balogh (MVM Group)
Csaba Csiszár (BME)
Tamás Czikora (MOL Group)
Papp Zoltán (Porsche Hungária)
Tamás Strang (BKK)
Candidate Member: Péter Boros (EDRI)

Our Activity in 2025:
A Series of Cross-sectoral Workshops

Based on participant feedback, JÁK's most popular and most highly regarded "products" are the thematic sectoral workshops.

Building on the success of our previous programs, we organized a workshop discussion every quarter, inviting stakeholders from the e-mobility sector (from business, government, and academia):



- **FEBRUARY 2025** – The first workshop of the year was hosted by the **Innovation and Training Center of Porsche Hungária**. The focus was on developing our proposals concerning the domestic regulatory framework for e-mobility.
- **APRIL 2025** – At the consultation held at the **MOL Campus**, we reviewed legislation affecting the industry, as well as the current state of transport electrification and innovation.
- **JUNE 2025** – Our summer workshop took place **at the headquarters of MVM**, where we traditionally examined the broader market, technological, and economic environment of energy–mobility sector integration.
- **NOVEMBER 2025** – Our autumn meeting was hosted by the **MOONCITY** center of Porsche Hungária. The main topics were the "National Access Point" and AFIR data reporting requirements, and we also discussed the state of electromobility in the capital.

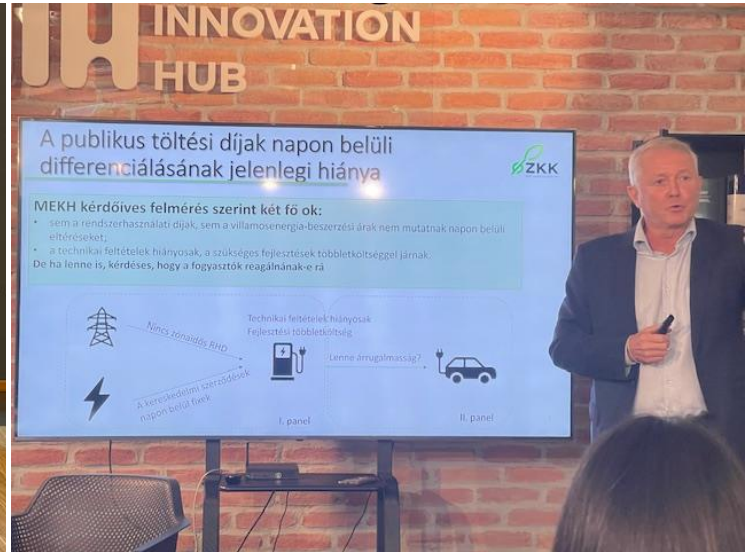
Our Activity in 2025: Sharing Knowledge and Information

We continued our efforts to showcase innovations and industry best practices that have emerged within the energy–mobility ecosystem.

- JÁK participated in the e-mobility forum series organized by the ZKK (Zero Carbon Centre), the main topic of which was the relationship between the charging infrastructure and the electricity grid.
- We provided comments on several draft legislative proposals.
- We shared our experience with other stakeholders and organizations.

Cooperating Institutions and Organisations:

- Hungarian Energy and Public Utility Authority
- Hungarian Public Road Plc.
- National Tax and Customs Administration
- BME Zero Carbon Centre
- Hungarian Hydrogen and Fuel Cell Association
- Hungarian Solar Panel Association
- Hungarian Battery Alliance



Our Activity in 2025: Representing Hungarian E-Mobility

JÁK's prestige is reflected in the fact that, in response to numerous invitations, we are regularly asked to present on the state of domestic electromobility at both national and international events. The most significant such events in 2025 were:

- **E-Fleet Management Conference** – May 15
- **Business Events Fleet Management Conference** – October 15
- **EnergyCon Conference** – November 26–27

Key professional and public policy matters:

- Providing comments on the Green Charging Certification System (ZÖTIR)
- Drafting amendments in connection with the Act on Cash Payments
- Reviewing the national regulatory framework for e-mobility (proposals to amend laws and government decrees)
- Providing comments on supplementary AFIR regulations
