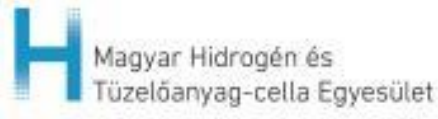
TEN YEARS OF PROMOTING THE CLEAN ENERGY AND MOBILITY TRANSITION IN HUNGARY– ANNUAL REPORT ON THE YEAR 2024

Jedlik Ányos Magyar Elektromobilitási Klaszter

Key Members and Partners 2014-2024



The Re-elected Cluster Board 2024

Executive Director:
Zoltán Vígh
Chairman: Róbert Kun (TTK HUN-REN Research Centre for Natural Sciences)

Members of the Board:

Alexandra Gulácsi-Szálkay (E.ON Hungaria)
Szabolcs Balogh (MVM Group/Mobiliti)
Csaba Csiszár (BME Budapest University of Technology and Economics)
Tamás Czikora (MOL Group)
Zoltán Papp (Porsche Hungaria)
Tamás Strang (BKK Centre for Budapest Transport)

Our “Brandname” Main Activity: Series of Regulatory Workshops

According to the feedback from participants, the most popular and highly recognised "products" of the JÁK are the thematic sectoral workshops. In the course of the year, building on the success of our previous programmes, **we organised four quarterly thematic workshops** to which we invited e-mobility stakeholders (from business, government and academia) at the following dates and locations:

- **28 February 2024** - Porsche Hungaria MOONCITY
- **6 June 2024** - MVM Headquarter Jedlik Ányos Hall
- **17 July 2024** - MOL Campus
- **24 October 2024** - Porsche Hungaria MOONCITY

In line with our core mission, we aim to facilitate the exchange of information on the energy-mobility transition on the most relevant issues, such as:

- The impact of decarbonisation regulation on the automotive industry
- Requirements and challenges of the new EU Regulation on Alternative Fuel Infrastructure (AFIR)

Knowledge Sharing and Information Exchange

We continued our efforts to showcase innovations and best industry practices in the integrated energy-mobility ecosystem.

- JÁK regularly incorporated industry experiences into the opinions and position papers it sent to the government.
- In 2024, we participated in the debate on support concepts for EVs and the charging infrastructure.
- We shared our experience with other sectoral players and organisations.

Cooperating professional partner organisations:

- Hungarian Battery Association
- Mobility of the Future Association
- Hungarian Hydrogen and Fuel Cell Association
- Hungarian Solar Cell and Solar Collector Association
- Hungarian Automotive Industry Association

Representing E-Mobility in Hungary and Abroad

The prestige of JÁK is demonstrated by the fact that **we are regularly invited to report on the state of electromobility in Hungary at national and international events**. The main such events in 2024 were:

- E-Fleet Management Conference - 15 May
- Klassis "E as Energy" Conference – 16 May
- Budapest E-Mobility Conference - 22 May
- Portfolio Automotive Business in CEE Region – 5 June
- Portfolio Energy Investment Forum - 10 October
- Business Events Fleet Management Conference - 15 October
- Hungarian Battery Week, E-Mobility Day - 7 November
- REKK "Electrification Trends, Distribution Network Impacts" Conference - 12 November
- EnergyCon Conference - 26-27 November
